

Counting, Cardinality	Spring 1 Mastering Number Coverage	Spring 1 NCETM Big Ideas Coverage	Spring 2 Mastering Number Coverage	Spring 2 NCETM Big Ideas Coverage
Oral counting – saying number words in sequence		Count on and back to 30 with a number track. Vary start and finish points. Vary orientation of the number track	practise counting aloud (wk16)	
<b>Counting Principles and Understanding of cardinality</b> *tagging each object with one number word *knowing last number counted gives total so far, *conservation – knowing number does not change if things are rearranged		Counting objects that can't be moved up to 10  Counting objects that can't be seen eg pennies in a pot  Introduce the second 5 frame leading to introducing the 10 frame.	revisit the principles of counting. (wk16)	
Numeral recognition/ meaning	match arrangements of 3, 4 and 5 dots to the correct numerals. (wk11)  recognise numerals 1–5 (wk12)  <b>match numerals to quantities in order (wk12) match numerals to representations (wk12)</b>	Introduce and write numbers 6-9 – matching to pictorial/practical representations. <i>Spring Unit 7 Wk 2 &amp; 3</i>		
Subitising: recognising small quantities without needing to count them all	use their fingers to quickly show quantities on 1 hand (wk11)  <b>begin to develop their conceptual subitising skills with linear and paired arrangements of up to 5 dots. (wk11)</b>  <b>visualise and recreate arrangements of 3, 4 and 5 dots (wk11)</b>  <b>visualise and describe arrangements of dots on a die (wk11) and recognise die patterns to 6</b>  <b>use dice to link subitised amounts with 1-to-1 counting actions. (wk11)</b>	Subitise up to 5 when the items are varied eg shape cards	<b>subitise arrangements of 6 and NOT 6 (wk17)</b>  <b>use conceptual subitising strategies to derive dice patterns to 8 (wk19)</b>	Make own dot patterns above 5 – counters/stickers/finger printing

Doubles	<p><b>link die patterns to numbers shown on their fingers (wk11)</b></p> <p><b>use die patterns to play track games.(wk11)</b></p>		<p>use their fingers to show 2 and 4 as doubles. (wk19)</p> <p>use the language of doubles to describe die/dice patterns (wk19)</p> <p>see when a pattern is and when it is NOT a double. (wk19)</p> <p>make doubles patterns using their fingers (wk19)</p> <p>use objects to make doubles patterns and describe where they can see the pattern of doubles. (wk19)</p> <p>use positional language to describe spatial arrangements of objects (wk19)</p> <p>visualise doubles patterns to 5 and 5. (wk19)</p> <p><b>use their fingers to represent doubles and NOT doubles (wk20)</b></p> <p><b>investigate patterns of doubles in interlocking cube models of the Numberblocks. (wk20)</b></p>	
<b>Composition</b>	Spring 1		Spring 2	
<p>Seeing smaller numbers within a number</p> <p>Inverse operations – partitioning and recombining parts and wholes</p>	<p><b>show ways of making 5 on their fingers (wk13)</b></p> <p><b>understand that 5 can be partitioned (split) into different parts (wk13)</b></p> <p><b>be able to explain what the parts are (wk13)</b></p> <p><b>use what they know about 5 to work out a hidden number. (wk13)</b></p>	<p>Part part whole with numbers up to 5</p> <p>Building from real world scenario eg sheep in a field, to pictures of sheep, to counters to represent sheep, to numerals.</p> <p>Autumn Unit 2 Wk 4</p>	<p><b>use generalised statements to describe the ‘5 and a bit’ composition of the numbers 6–8. (wk16)</b></p> <p><b>use skills of conceptual subitising to describe parts of a whole set (wk18)</b></p> <p><b>visualise arrangements and use gestures to describe the numbers within a whole set. (wk18)</b></p>	<p>Conceptual subitising: Begin to subitise using number fact knowledge (above 5)</p> <p>Number bonds – <i>knowing</i> which pairs make a given number up to 5</p> <p>A number can be partitioned into more than 2 numbers (up to 5)</p>

<p>Partitioning into more than two numbers</p> <p>Knowing which pairs make a given number</p>	<p><b>represent 4 in different ways on a die frame. (wk14)</b></p> <p><b>use their fingers to represent 6 as '5 and a bit' (wk14)</b></p> <p><b>use double dice frames to represent 6 as 5 and 1 more. (wk14)</b></p> <p><b>match die representations of numbers 1–6 to representations on their fingers (wk14)</b></p> <p><b>see that 5 and '2 more' make 7. (wk14)</b></p> <p><b>count out 6 blocks from a collection (14)</b></p> <p><b>replace 1 block and know that there are still 6 (wk14)</b></p> <p><b>add another block to make 7. (wk14)</b></p>	<p>Number Bonds for each number up to 5 (link to conservation – shake and add/shake and spill) Partitioning a number into different parts <i>Spring Unit 6 Wk 1</i></p>	<p><b>investigate ways of making 7 with two parts (wk18)</b></p> <p><b>use their fingers to make and describe 7 as '5 and 2 more'. (wk18)</b></p> <p><b>notice when towers are made of 7 or NOT 7 interlocking cubes (wk18)</b></p> <p><b>work out the missing part of 7 using the '5 and a bit' structure. (wk18)</b></p> <p><b>see that 7 can be composed in different ways (wk18)</b></p> <p><b>explain their understanding of the composition of 7. (wk18)</b></p> <p><b>talk about some of the different attributes they notice (colour, size, function, shape, etc.) (wk20)</b></p> <p><b>sort objects according to attributes described by an adult (wk20)</b></p> <p><b>describe attributes that they notice for a group of objects (wk20)</b></p> <p><b>sort and re-sort objects according to their own attributes. (wk20)</b></p> <p><b>use their fingers to show numbers to 8 (wk20)</b></p> <p><b>describe attributes of the Numberblocks (wk20)</b></p> <p><b>sort the Numberblocks using the criteria 'odd blocks' or 'even tops'. (wk20)</b></p> <p>consolidate their understanding of 8 as '5 and 3 more' (wk17)</p>	
---	---	---	--	--

<b>Comparison</b>	Spring 1		Spring 2	
More than/Fewer than/Equal  Comparing numbers and reasoning	<p><b>say when they can see that someone has more or fewer of the same kind of object (wk15)</b></p> <p><b>use the words ‘an equal number’ to say when there is the same number of items in 2 sets (wk15)</b></p> <p>use ‘more than’ and ‘fewer than’ to describe quantities (wk15)</p> <p><b>know that it is quantity – not colour – that determines if 1 set has more or fewer of the same (wk15)</b></p>	<p>Compare numbers 6-9 More than/fewer than <i>Spring Unit 8 Wk 4</i></p>	<p><b>reason about which numbers are ‘more than’ others. (wk17)</b></p> <p><b>notice when numbers are increased or decreased and explain their thinking. (wk17)</b></p> <p><b>recognise ways in which objects are similar to or different from each other (wk20)</b></p>	Compare subitising patterns
1 more than/less than Ordering	<p><b>help to build towers in order from 1–5 squares (wk12)</b> <b>order numbers from 1–5. (wk12)</b></p>	Forming 1-10 number track and comparing – knowing the 1 more/1 less relationship	<p><b>investigate the ‘1 more/1 less’ pattern of the base-10 counting system (wk16)</b></p>	<p>First, then, now with 2 more/less (using count on and count back) <i>Summer Unit 13 Wk 3 &amp; 4</i></p>

	<p>see the staircase pattern and recognise that each number is 1 more (wk12) order towers of 1–5 interlocking cubes (wk12)</p> <p>notice when we have '1 more' and when we do NOT have '1 more'. (wk12)</p> <p>represent staircase patterns in different ways, knowing that each new 'step' is 1 more than the last. (wk12)</p>		<p>begin to order numbers between 1 and 10, noticing the '5 and a bit' structure. (wk16)</p> <p>describe the '1 more/1 less' relationship of numbers to 10 (wk16)</p> <p>work together to order numbers between 1 and 10, noticing the '5 and a bit' structure. (wk16)</p> <p>order Numberblock images to 8. (wk17)</p> <p>describe how to place the numbers 1 to 8 in order. (wk17)</p> <p>explain how to order quantities to 10 (wk17)</p>
